

# The Best in Tank Cleaning Technology

## TIME Efficiency

**1** Ethanol is fermented from many sources of starch, including corn, wheat, grain sorghum, barley, and potatoes, and from sugar crops such as sugar cane and sweet sorghum.

**3** ATP Cleaning Validation Products can optimize and validate your cleaning process to insure sanitation every time.

**2** Orbijet chemistries are designed to clean and remediate hydrocarbon based residuals found in crude oil storage tanks, drilling rig, muds and rail car tanks.

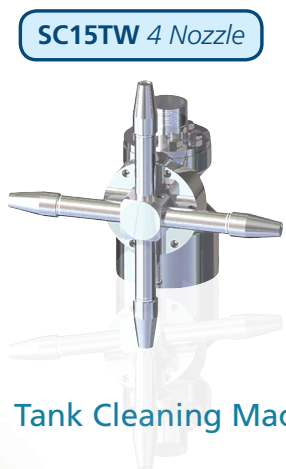

**4** Engineering Services We offer complete engineering services for the installation and operation of automated tank cleaning systems.

**5** Clean In Place (CIP)  
• Less Rinse Time  
• Increase Production  
• Reduce Chemical Consumption  
• Reduce set point of solution

**Tank Cleaning Technologies** is a major supplier of tank cleaning equipment and systems to the ethanol (Synthetic Fuels) industries worldwide.
