Tank Cleaning Machines

Model: SC 40RT

External drive tank cleaning system. The Number 1 automated tank cleaning machine in the BioFuels Industry Worldwide. Maintenance cost is 60% or more less than conventional machines.

Model: SC 15TW

Model: SC 45TW

Advanced
Cleaning Chemistries
for the BioFuels Industry

ORB3001SC - Super Concentrated Additive
ORB3001DP - Blended Delivery Package

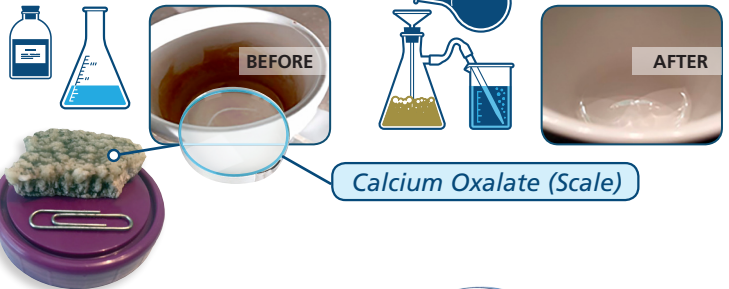

The **ORB3001** family of chemistries will remove all contamination commonly found in BioFuel fermenters, associated pipelines, heat exchangers and other process equipment commonly used in the BioFuel production process. **ORB3001** reduces the setpoint (*concentration %*) commonly used for caustic soda thus reducing caustic soda usage while extending the life of the CIP Solution.

The **ORB3001** product eliminates the accumulation of Calcium Oxalate and other scale forming products created in the BioFuels production process. The use of **ORB3001**, when used as directed, eliminates the need to descale any associated process and storage equipment in the future.

ORB3001 is a GRAS Component Certified Product

Generic Caustic Chemistry Used Here

ORB 3001 Plus Caustic Soda
